

## **Technical data**

Pneumatic stripping machine | Air pressure 6 bar | 87 PSI

# **Application Range**

Stripping and removing insulation from cables with large conductor cross-sections from 6 to 70 mm<sup>2</sup>, insulation diameter 4 to 15 mm, to a stripping length of 5 to 50 mm

applicable due to different blade pairs

# Reliable

Quickly achieve the perfect stripping result thanks to precise cable guidance including 6 guide sleeves

## Expandable

with the crimping machine UP 60-CFM, the optimal wire processing solution for the high-voltage range

## Customized

Customized versions in design and function are available on request

## Reliable

Quality Made in Germany and CE compliant
